Index to Volume XVIII (1967)

AUTHOR LISTING

Anderson, W. D. E., Quirk, R. W., Turner, P. G., and Fletcher, N. C., "Industrial Change—Challenge and Opportunity," October, p. 576.

Andrews, Robert B., and Barnes, Ralph M., "The Influence of the Duration of Observation Time on Performance Rating," April, p. 243.

Ayoub, M. M., and Trombley, Donald J., "Experimental Determination of an Optimal Foot Pedal Design," September, p. 550.

Bakhru, Ashok N., and Bahary, Emil S. (Technical Note), "A Stocking Rule for Bi-Level Inventory Systems," October, p. 617.

Baloff, Nicholas, "Estimating the Parameters of the Startup Model—An Empirical Approach," April, p. 248.

Bartscht, Karl G., "Hospital Staffing Methodologies—Concepts, Development, and Uses," December, p. 708.

Bedworth, David D., "Discrete-Part Manufacturing Control by Digital Computer," February, p. 159.

Bernhard, Richard H. (Technical Note), "On the Inconsistency of the Soper and Sturm-Kaplan Conditions for Uniqueness of the Internal Rate of Return," August, p. 498.

Bernhard, Richard H., "The Interdependence of Productive Investment and Financing Decisions," October, p. 610.

Bernhard, Richard H. (Technical Note), "Use of Inventories for Reduction of Trim Losses," November, p. 667.

Betke, Richard L., "Application of Behavioral Sciences to the Practice of Industrial Engineering," May, p. 293.

Carroll, John M., "A Methodology for Information Systems Analysis," November, p. 649.

Champion, Dean J., "Depersonalization: Some Implications for Bank Employees," March, p. 223.

Chang, Yu Sang, "Reorder Point Models with Non-Decreasing Stockout Costs," June, p. 365.

Cooper, Dan (Technical Note), "Rounding Error Problems in Allocation," September, p. 561.

Crocker, D. C., "Intercorrelation and the Utility of Multiple Regression in Industrial Engineering," January, p. 79.

Denardo, E. V., and Mitten, L. G., "Elements of Sequential Decision Processes," January, p. 106.

Denby, Daniel C., "Minimum Downtime as a Function of Reliability and Priority Assignments in Component Repair," July, p. 436.

Digman, Lester A., "PERT/LOB: Life-Cycle Technique," February, p. 154.

Disney, Ralph L., "Analytic Studies of Stochastic Networks Using Methods of Network Decomposition," January, p. 140.

Doxie, Floyd T., and Ullom, K. John, "Human Factors in Designing Controlled Ambient Systems," November, p. 631.

Dudek, R. A., and Ghare, P. M., "Make-Span Sequencing of *M*-Machines," January, p. 131.

Emma, Charles King, "Observations on Physical Inventory and Stock Record Error," July, p. 396.

Engelman, L., Roach, H. H., and Schick, G. J. (Technical Note), "A Computer Program for the Exact Confidence Intervals," August, p. 495.

Fein, Mitchell, "A Rational Basis for Normal in Work Measurement," June, p. 341.

Fisher, Carolyn, and Nemhauser, George L., "Multicycle Project Planning," April, p. 278.

Fox, P. D., and Kriebel, C. H., "An Empirical Study of Scheduling Decision Behavior," June, p. 354.

Francis, Richard L., "On Some Problems of Rectangular Warehouse Design and Layout," October, p. 595.

Freeman, D. R., and Jucker, J. V., "The Line Balancing Problem," June, p. 361.

Galbraith, Jay R., "Some Motivational Determinants of Job Performance," April, p. 266.

Galbraith, Jay R., "The Use of Subordinate Participation in Decision-Making," September, p. 521.

Gibra, Isaac, N., "Optimal Control of Processes Subject to Linear Trends," January, p. 35.

Giffin, Walter C. (Technical Note), "The Use of Generating Functions in Determining the Characteristics of Lead Time Demand," March, p. 237.

Glassey, C. R., "An Algorithm for a Machine Loading Problem," October, p. 584.

Goldman, Jay (editor), "AIIE Research Abstracts," February, p. 167.

Gregory, William R., and Beged Dov, Aharon, "On the Determination of Optimal Shrinkage Allowance in a Job Shop," April, p. 284.

Hancock, Walton M., "The Prediction of Learning Rates for Manual Operations," January, p. 42.

Hassan, M. Zia and Block, Stanley M., "A Study of Simultaneous Positioning," December, p. 682.

Hauser, Norbert, "Computers in Industrial Engineering Design Education," January, p. 86.

Henry, Bruce B., and Jones, Curtis H., "Linear Programming for Production Allocation," July, p. 403.

Hill, Lawrence S., "Towards an Improved Basis of Estimating and Controlling R&D Tasks," August, p. 482.

Iglehart, Donald L., "Recent Results in Inventory Theory," January, p. 48

Joss, Ernest J., and Polk, Eugene J., "Integrated Management Information System," November, p. 625.

Kamaluddin, Bakte A., and Burgess, A. R., "Economic Design of Discrete Physical Systems Subject to Fluctuating Environment," January, p. 58.

Kanon, Dov, "Application of Nonparametric Statistics to Industrial Engineering," April, p. 272.

Kiefer, Carl J., "The Industrial Engineer and His Company's Long-Range Facilities Plan," November, p. 639.

King, William R., "The Systems Concept in Management," May, p. 320.

Klein, M., and Klimpel, R. R., "Application of Linearly Constrained Nonlinear Optimization to Plant Location and Sizing," January, p. 90.

TITLES AND SUBJECTS

AIIE

"AIIE Research Abstracts," Jay Goldman (editor), February, p. 167.

Data Processing

"Activity Sampling with Applications to Time Standard Estimation," Joseph J. Moder, January, p. 24.
"Toward Synthetic Methods Analysis," Anthony K. Mason and Douglas M. Towne, January, p. 52.
"Developing Variability Measures for Predetermined Time Systems," Ravinder Nanda, January, p. 120.
"A Computer Program for Time Study Analysis," Kenneth K. Kopp, February, p. 147.
"Discrete-Part Manufacturing Control by Digital Computer," David D. Bedworth, February, p. 159.
"CORELAP—COmputerized RElationship LAyout Planning," Robert C. Lee and James M. Moore, March, p. 195.
"A Methodology for Information Systems Analysis," John M. Carroll, November, p. 649.
"Data Collection Systems—Part 1: Characteristics of Errors," William A. Smith, December, p. 703.

Decision Theory

"Quantification of Subjectively Determined Data in the Formulation and Utilization of Mathematical Models," Glen D. Self, January, p. 20.
"Elements of Sequential Decision Processes," E. V. Denardo and L. G. Mitten, January, p. 106.
"The Systems Concept in Management," William R. King, May, p. 320.
"An Empirical Study of Scheduling Decision Behavior," P. D. Fox and C. H. Kriebel, June, p. 354.
"Operations Research as a Tool for Decision-Making," Hans J. Laue, September, p. 539.

Design

"Economic Design of Discrete Physical Systems Subject to Fluctuating Environment," Bakte A. Kamaluddin and A. R. Burgess, January, p. 58.
"Computers in Industrial Engineering Design Education," Norbert Hauser, January, p. 86.
"Human Factors in Designing Controlled Ambient Systems," Floyd T. Doxie and K. John Ullom, November, p. 631.

Documentation

"A Computer Program for Time Study Analysis," Kenneth K. Kopp, February, p. 147.
"PERT/LOB: Life-Cycle Technique," Lester A. Digman, February, p. 154.
"Timekeeping for Simulation," Roy E. Lave, Jr., July, p. 389.
"Observations on Physical Inventory and Stock Record Error," Charles King Emma, July, p. 396.
"Towards an Improved Basis of Estimating and Controlling R & D Tasks," Lawrence S. Hill, August, p. 482.

Dynamic Programming

"Elements of Sequential Decision Processes," E. V. Denardo and L. G. Mitten, January, p. 106.
"Production Scheduling under a Learning Effect by Dynamic Programming," B. C. Spradlin and D. A. Pierce, March, p. 219.
"A Note on Capital Budgeting" (Technical Note), George L. Nemhauser, June, p. 375.
"Setting Maintenance Inspection Intervals Using Dynamic Programming" (Technical Note), D. J. White, June, p. 376.

Economics

"Quantification of Subjectively Determined Data in the Formulation and Utilization of Mathematical Models," Glen D. Self, January, p. 20.
"Activity Sampling with Applications to Time Standard Estimation," Joseph J. Moder, January, p. 24.
"Economic Design of Discrete Physical Systems Subject to Fluctuating Environment," Bakte A. Kamaluddin and A. R. Burgess, January, p. 58.
"Application of Linearly Constrained Nonlinear Optimization to Plant Location and Sizing," M. Klein and R. R. Klimpel, January, p. 90.
"Acceptance Sampling Plans with Price Differentials," Robert Roeloffs, January, p. 96.
"Applications of Complex Behavioral Models to Regional and Organizational Analysis," David L. Raphael, January, p. 123.
"On the Determination of Optimal Shrinkage Allowance in a Job Shop," William R. Gregory and Aharon Beged Dov, April, p. 284.
"The Role of Labor in Sweden," John Lofblad, May, p. 324.
"Reorder Point Models with Non-Decreasing Stock-out Costs," Yu Sang Chang, June, p. 365.
"Adapting Methods-Measurement Techniques to Extreme Fluctuations in Workload: A Case Study," Richard W. Pomeroy, July, p. 424.
"Towards an Improved Basis of Estimating and Controlling R & D Tasks," Lawrence S. Hill, August, p. 482.
"Integrated Management Information System," Ernest J. Joss and Eugene J. Polk, November, p. 625.
"The Industrial Engineer and His Company's Long-Range Facilities Plan," Carl J. Kiefer, November, p. 639.
"Total Profit Improvement Through Inter-Index Analysis," Shizuo Senju, December, p. 696.

Education

"Computers in Industrial Engineering Design Education," Norbert Hauser, January, p. 86.
"Progress of Graduate Research in Industrial Engineering," George F. Schrader and Glen D. Self, January, p. 112.
"Which Test Statistic—A Scramble Book Approach," James M. Moore, May, p. 300.
"Introducing Queueing Concepts: A Simulation Approach," Paul E. Torgersen, Harold E. Hayes, and Adam Abruzzi, May, p. 328.
"Administration and Technical Competence," Clinton H. Whitehurst, Jr., June, p. 348.
"The Curriculum in Industrial Engineering," Robert H. Roy, Harold T. Amrine, W. Grant Ireson, Robert N. Lehrer, Melvin R. Lohmann, and Andrew Schultz, Jr., September, p. 509.

Engineering Economy

"A Note on Capital Budgeting" (Technical Note), George L. Nemhauser, June, p. 375.
"On the Inconsistency of the Soper and Sturm-Kaplan Conditions for Uniqueness of the Internal Rate of Return" (Technical Note), Richard H. Bernhard, August, p. 498.
"A Brief History of Interest Calculations," Gerald W. Smith, October, p. 569.
"The Interdependence of Productive Investment and Financing Decisions," Richard H. Bernhard, October, p. 610.

Facilities Planning

"Quantitative Approaches to Facilities Planning and the Planning of Manufacturing Processes," Robert F. Miller, January, p. 10.

"Application of Linearly Constrained Nonlinear Optimization to Plant Location and Sizing," M. Klein and R. R. Klimpel, January, p. 90.
"Make-Span Sequencing on *M*-Machines," R. A. Dudek and P. M. Ghare, January, p. 131.
"CORELAP—COmputerized RElationship LAyout Planning," Robert C. Lee and James M. Moore, March, p. 195.
"On Some Problems of Rectangular Warehouse Design and Layout," Richard L. Francis, October, p. 595.
"The Industrial Engineer and His Company's Long-Range Facilities Plan," Carl J. Kiefer, November, p. 639.
"Automated Layout Design Program," Jerrold M. Seehof and Wayne O. Evans, December, p. 690.

Forecasting

"Quantification of Subjectively Determined Data in the Formulation and Utilization of Mathematical Models," Glen D. Self, January, p. 20.
"Intercorrelation and the Utility of Multiple Regression in Industrial Engineering," D. C. Crocker, January, p. 79.
"The Use of Generating Functions in Determining the Characteristics of Lead Time Demand" (Technical Note), Walter C. Giffin, March, p. 237.
"Estimating the Parameters of the Startup Model—An Empirical Approach," Nicholas Baloff, April, p. 248.
"On the Determination of Optimal Shrinkage Allowance in a Job Shop," William R. Gregory and Aharon Beged Dov, April, p. 284.
"Hospital Staffing Methodologies—Concepts, Development, and Uses," Karl G. Bartscht, December, p. 708.

Hospital

"Hospital Staffing Methodologies—Concepts, Development, and Uses," Karl G. Bartscht, December, p. 708.

Human Factors

"The Prediction of Learning Rates for Manual Operations," Walton M. Hancock, January, p. 42.
"Application of Behavioral Sciences to the Practice of Industrial Engineering," Richard L. Betke, May, p. 293.
"Innovation and Conflict in Industrial Engineering," Ross A. Webber, May, p. 306.
"Design of Work Stations," Stephan Konz, July, p. 413.
"The Use of Subordinate Participation in Decision-Making," Jay R. Galbraith, September, p. 521.
"Industrial Engineering and Socio-Technical Systems," Peter B. Vaill, September, p. 530.
"Experimental Determination of an Optimal Foot Pedal Design," M. M. Ayoub and Donald J. Trombley, September, p. 550.
"Industrial Change—Challenge and Opportunity," W. D. E. Anderson, R. W. Quirk, P. G. Turner, and N. C. Fletcher, October, p. 576.
"Human Factors in Designing Controlled Ambient Systems," Floyd T. Doxie and K. John Ullom, November, p. 631.
"Manufacturing Assembly Instructions: Part III. Abstraction, Complexity, and Information Theory," Stephan A. Konz, George L. Dickey, Carl McCutchan, and Bruce Koe, November, p. 657.
"A Study of Simultaneous Positioning," M. Zia Hassan and Stanley M. Block, December, p. 682.

Information Theory

"Manufacturing Assembly Instructions: Part II. Combinations and Forms of Media," Stephan A. Konz and George L. Dickey, January, p. 63.
"Information Concepts in Network Planning," John N. Noettl and Philip Brumbaugh, July, p. 428.
"Manufacturing Assembly Instructions: Part III. Abstraction, Complexity, and Information Theory," Stephan A. Konz, George L. Dickey, Carl McCutchan, and Bruce Koe, November, p. 657.

Inventory Control

"Risk and Performance Analysis in the Design of Distribution Systems," George M. Parks, January, p. 14.
"Recent Results in Inventory Theory," Donald L. Iglehart, January, p. 48.
"The Use of Generating Functions in Determining the Characteristics of Lead Time Demand" (Technical Note), Walter C. Giffin, March, p. 237.
"Hybrid-Analog Simulation of Stochastic Industrial Storage Problems," Colin D. Lewis, April, p. 260.
"Reorder Point Models with Non-Decreasing Stock-out Costs," Yu Sang Chang, June, p. 365.
"Observations on Physical Inventory and Stock Record Error," Charles King Emma, July, p. 396.
"Linear Programming for Production Allocation," Bruce B. Henry and Curtis H. Jones, July, p. 403.
"Inventory Returns and Special Sales" (Technical Note), Eliezer Naddor, September, p. 560.
"A Stocking Rule for Bi-Level Inventory Systems" (Technical Note), Ashok N. Bakhru and Emil S. Bahary, October, p. 617.
"Use of Inventories for Reduction of Trim Losses" (Technical Note), Richard H. Bernhard, November, p. 667.

Job Evaluation

"An Investigation into Certain Aspects of Rating Practice," E. M. Mansoor, February, p. 184.
"Another Look at Work Measurement," Harold E. Smalley, March, p. 202.
"The Influence of the Duration of Observation Time on Performance Rating," Robert B. Andrews and Ralph M. Barnes, April, p. 243.
"Grievance Arbitration and the Industrial Engineer," Ralph Presgrave, October, p. 605.

Labor Relations

"Depersonalization: Some Implications for Bank Employees," Dean J. Champion, March, p. 223.
"The Role of Labor in Sweden," John Lofblad, May, p. 324.
"Swedish Unions and MTM," Kurt Nordgren, May, p. 325.
"A Rational Basis for Normal in Work Measurement," Mitchell Fein, June, p. 341.
"Grievance Arbitration and the Industrial Engineer," Ralph Presgrave, October, p. 605.

Linear Programming

"An Evaluation of Linear Programming and Multiple Regression for Estimating Manpower Requirements," Raphael R. Thelwell, March, p. 227.
"Linear Programming for Production Allocation," Bruce B. Henry and Curtis H. Jones, July, p. 403.
"Integer Linear Programming," Clifford C. Petersen, August, p. 456.
"An Algorithm for a Machine Loading Problem," C. R. Glassey, October, p. 584.

Maintenance

"Setting Maintenance Inspection Intervals Using Dynamic Programming" (Technical Note), D. J. White, June, p. 376.
"Minimum Downtime as a Function of Reliability and Priority Assignments in Component Repair," Daniel C. Denby, July, p. 436.

Materials Flow and Handling

"Research and Development of Analytical Systems to Reduce Product Assembly Costs," Theodore O. Prenting, January, p. 101.
"Computerized Management of Production Control," Karl E. Korn and James H. Lamb, December, p. 677.

Measurement

"Activity Sampling with Applications to Time Standard Estimation," Joseph J. Moder, January, p. 24.
"The Prediction of Learning Rates for Manual Operations," Walton M. Hancock, January, p. 42.
"Intercorrelation and the Utility of Multiple Regression in Industrial Engineering," D. C. Crocker, January, p. 79.
"Developing Variability Measures for Predetermined Time Systems," Ravinder Nanda, January, p. 120.
"A Computer Program for Time Study Analysis," Kenneth K. Kopp, February, p. 147.
"An Investigation into Certain Aspects of Rating Practice," E. M. Mansoor, February, p. 184.
"Another Look at Work Measurement," Harold E. Smalley, March, p. 202.
"The Influence of the Duration of Observation Time on Performance Rating," Robert B. Andrews and Ralph M. Barnes, April, p. 243.
"PDS Work Measurement," Harry W. Secor and Eugene P. Kogovsek, April, p. 254.

"Rounding Error Problems in Allocation" (Technical Note), Dan Cooper, September, p. 561.
"An Algorithm for a Machine Loading Problem," C. R. Glassey, October, p. 584.
"Integrated Management Information System," Ernest J. Joss and Eugene J. Polk, November, p. 625.
"Computerized Management of Production Control," Karl E. Korn and James H. Lamb, December, p. 677.
"Hospital Staffing Methodologies—Concepts, Development, and Uses," Karl G. Bartscht, December, p. 708.

Quality Control

"Optimal Control of Processes Subject to Linear Trends," Isaac N. Gibra, January, p. 35.
"Acceptance Sampling Plans with Price Differentials," Robert Roeloffs, January, p. 96.
"Minimum Downtime as a Function of Reliability and Priority Assignments in Component Repair," Daniel C. Denby, July, p. 436.
"Quality Incentive to an Operator Based on Acceptance Sampling by Attributes" (Technical Note), S. G. Nandi and K. P. K. Nair, July, p. 440.
"Process Control by Means of Three-Dimensional Random Walks," M. Palmer Terrell, Charles S. Beightler, and Irvin L. Reis, August, p. 474.
"A Comparison of Some Old and New Methods in Establishing Confidence Intervals of Serially Connected Systems," George J. Schick, August, p. 489.
"A Computer Program for the Exact Confidence Intervals" (Technical Note), L. Engelman, H. H. Roach, and G. J. Schick, August, p. 495.
"An Application of Statistical Control to a Work Measurement Problem," Paul R. Lipton and Daniel J. Duffy, September, p. 526.

Queueing Theory

"Analytic Studies of Stochastic Networks Using Methods of Network Decomposition," Ralph L. Disney, January, p. 140.
"Introducing Queueing Concepts: A Simulation Approach," Paul E. Torgersen, Harold E. Hayes, and Adam Abruzzi, May, p. 328.

Simulation

"Computer Simulation of Railroad Freight Transport Operations," Frederick A. Koomanoff and James A. Bontadelli, January, p. 3.
"A Clinical Study of the Use of a Simulation Model," James L. McKenney, January, p. 30.
"Optimization Models for Production Lines," H. H. Young, January, p. 70.
"Applications of Complex Behavioral Models to Regional and Organizational Analysis," David L. Raphael, January, p. 123.
"Analysis and Computer Simulation of the Production and Distribution Systems of a Tufted Carpet Mill," Jerome A. Yurow, January, p. 135.
"Hybrid-Analog Simulation of Stochastic Industrial Storage Problems," Colin D. Lewis, April, p. 260.
"Introducing Queueing Concepts: A Simulation Approach," Paul E. Torgersen, Harold E. Hayes, and Adam Abruzzi, May, p. 328.
"Timekeeping for Simulation," Roy E. Lave, Jr., July, p. 389.
"Linear Programming for Production Allocation," Bruce B. Henry and Curtis H. Jones, July, p. 403.

Systems

"Economic Design of Discrete Physical Systems Subject to Fluctuating Environment," Bakte A. Kamaluddin and A. R. Burgess, January, p. 58.
"Optimization Models for Production Lines," H. H. Young, January, p. 70.
"The Systems Concept in Management," William R. King, May, p. 320.
"Minimum Downtime as a Function of Reliability and Priority Assignments in Component Repair," Daniel C. Denby, July, p. 436.
"A Comparison of Some Old and New Methods in Establishing Confidence Intervals of Serially Connected Systems," George J. Schick, August, p. 489.
"Industrial Change—Challenge and Opportunity," W. D. E. Anderson, R. W. Quirk, P. G. Turner, and N. C. Fletcher, October, p. 576.
"Human Factors in Designing Controlled Ambient Systems," Floyd T. Doxie and K. John Ullom, November, p. 631.
"A Methodology for Information Systems Analysis," John M. Carroll, November, p. 649.
